HOMework

Mathematics:

Homework frequency: Once a week

Duration in minutes: 30 minutes

Homework tasks: Mathematical exercises, online homework (such as MyMaths or Mathswatch), research tasks (such as famous mathematicians), design posters or other revision materials, revision for assessments.

Supportive Resources: Homework can be supported through the use of a number of online resources; specifically:

www.mymaths.co.uk

www.mathswatchvle.com

Modern Foreign Languages:

Homework frequency: Once a week

Duration in minutes: 30 minutes

Homework tasks: A range of learning and comprehension tasks will be set. Occasionally students will have to write about familiar topics in the foreign language (short paragraph max). MFL homework support is in LA10 on Tues and Thurs after school and includes access to computers if needed. Where homework is set from a website language learning course, switching on the sound is important to help with pronunciation of new words. For this type of homework, students are asked to bring evidence such as screenshots or parents will be asked to confirm that the required time has been spent on the homework task. MFL homework can involve learning vocabulary and parents can support in KS3 with testing and encouraging students to use "look-cover-write-check" as in primary school spellings. If there are difficulties with the homework, students should see their teacher BEFORE the date it is due.
